LANGUAGES: JavaScript/ES6, React JS, React Native, HTML, CSS / SCSS, Type Script, Tailwind CSS.

TOOLS/FRAMEWORK: Redux, Firebase, Github, Bitbucket, Jira, Trello, Android Studio, Xcode

PROJECTS

Figure 1
Roles & Responsibilities

- Built and maintained core features of a healthcare-focused React Native mobile app used globally by medical professionals. Contributed to modules that enabled real-time case sharing, image uploads, and clinical discussion forums.
- Focused on enhancing UI performance and cross-platform consistency across Android and iOS

Wallboard AI
Roles & Responsibilities

- Developed a React.js application that enables users to create custom wallboards for printing on magazines and banners. Integrated features for design customization and export options to ensure high-quality print outputs, enhancing the user experience and creative flexibility.
- Worked on user authentication and profile management, ensuring secure login and personalized user experiences.

Momentum

Roles & Responsibilities

- Implemented a subscription-based registration system for monthly user access.
- Defined and assigned roles and responsibilities for each user type.
- Spearheaded the creation of a secure and scalable ecosystem, enhancing user experiences and empowering data-driven decisions through advanced reporting and analytics capabilities.

AccessMyEAP

Roles & Responsibilities

- Developed the mobile applications (React native) for both Ios and Android platforms.
- Implemented a user-friendly appointment booking system, allowing users to schedule sessions with qualified counselors, streamlining access to crucial mental health support.
- Elevated employee well-being by providing convenient access to counseling services and personalized mental health insights, making a positive impact on mental and emotional health management.

Employee Management System (EMS)

Roles & Responsibilities

- Streamlined HR processes and improved employee engagement through the system's implementation.
- Ensured robust security measures and user authentication protocols to safeguard sensitive employee data.
- Developed a task management tool similar to Jira, enhancing team collaboration and project tracking efficiency.

Medmine

Roles & Responsibilities

- Developed a React.js application that enables users to manage their data easily. Integrated advanced filtering and sorting features to enhance data accessibility and organization.
- Implemented user-friendly dashboards for seamless data visualization and streamlined navigation.
- Worked on user authentication and profile management, ensuring secure login and personalized user experiences.
